

## What do you need to get started?

Ok so you're ready to get started with your new website.

What will we need from you?

The most important factor to consider about your website is what you want it to do, so give us a detailed brief of what you see the website doing from a practical point of view.

Secondly, think about what style you would like to see - maybe collect swatches of colour and links to other websites that you like. All this is useful information to help us devise a theme that you will be happy with.

Finally, content!

Your website is nothing without this and as we embark on putting the construction of the structure of your site, it's VERY important that you pull together the content ( words & pictures )

Then when the site is ready we can insert this to complete the process.

Our sites are built with your input, a live link is supplied and you are able to have input on the site as it develops.
