

Support

Network19 believes that ongoing support once your site goes live is essential.

Our sites are very easy to use, even for the most techno-phobic, but it's important that our customers know that help is always at hand from our dedicated support team.

As part of the hosting pack for your site we include a modest support and maintaince fee to ensure that we are able to provide the best possible ongoing service.

This eliminates the likelihood of getting big web maintainance bills through-out the year and giving you the freedom to concentrate on other things.

If you need help - simply call or e-mail us via the details on our contact page and we will take care of things for you.
