

Can you host my e-mail?

Yes we can.

As part of our web-hosting service we are able to set up e-mail accounts on the server, simply give us the e-mail accounts that you would like and we will set them up for you complete with passwords.

If you wish to access your e-mail 'remotely' ie. while on holiday, we can also set up the squirrelmail service, this allows the account holder to login to his/her e-mail from any online pc in the world.

If you need additional help setting up your e-mail on local machines, we can take care of this (Please note there may be a small charge applicable)
